

Molduras CIMENTÍCIAS

Molduras CIMENTÍCIAS

A STYROVILLE é focada na produção de soluções em isopor de alta performance para a construção civil, valorizando produtos que fazem diferença nos projetos mais complexos.

MODELOS PADRÕES

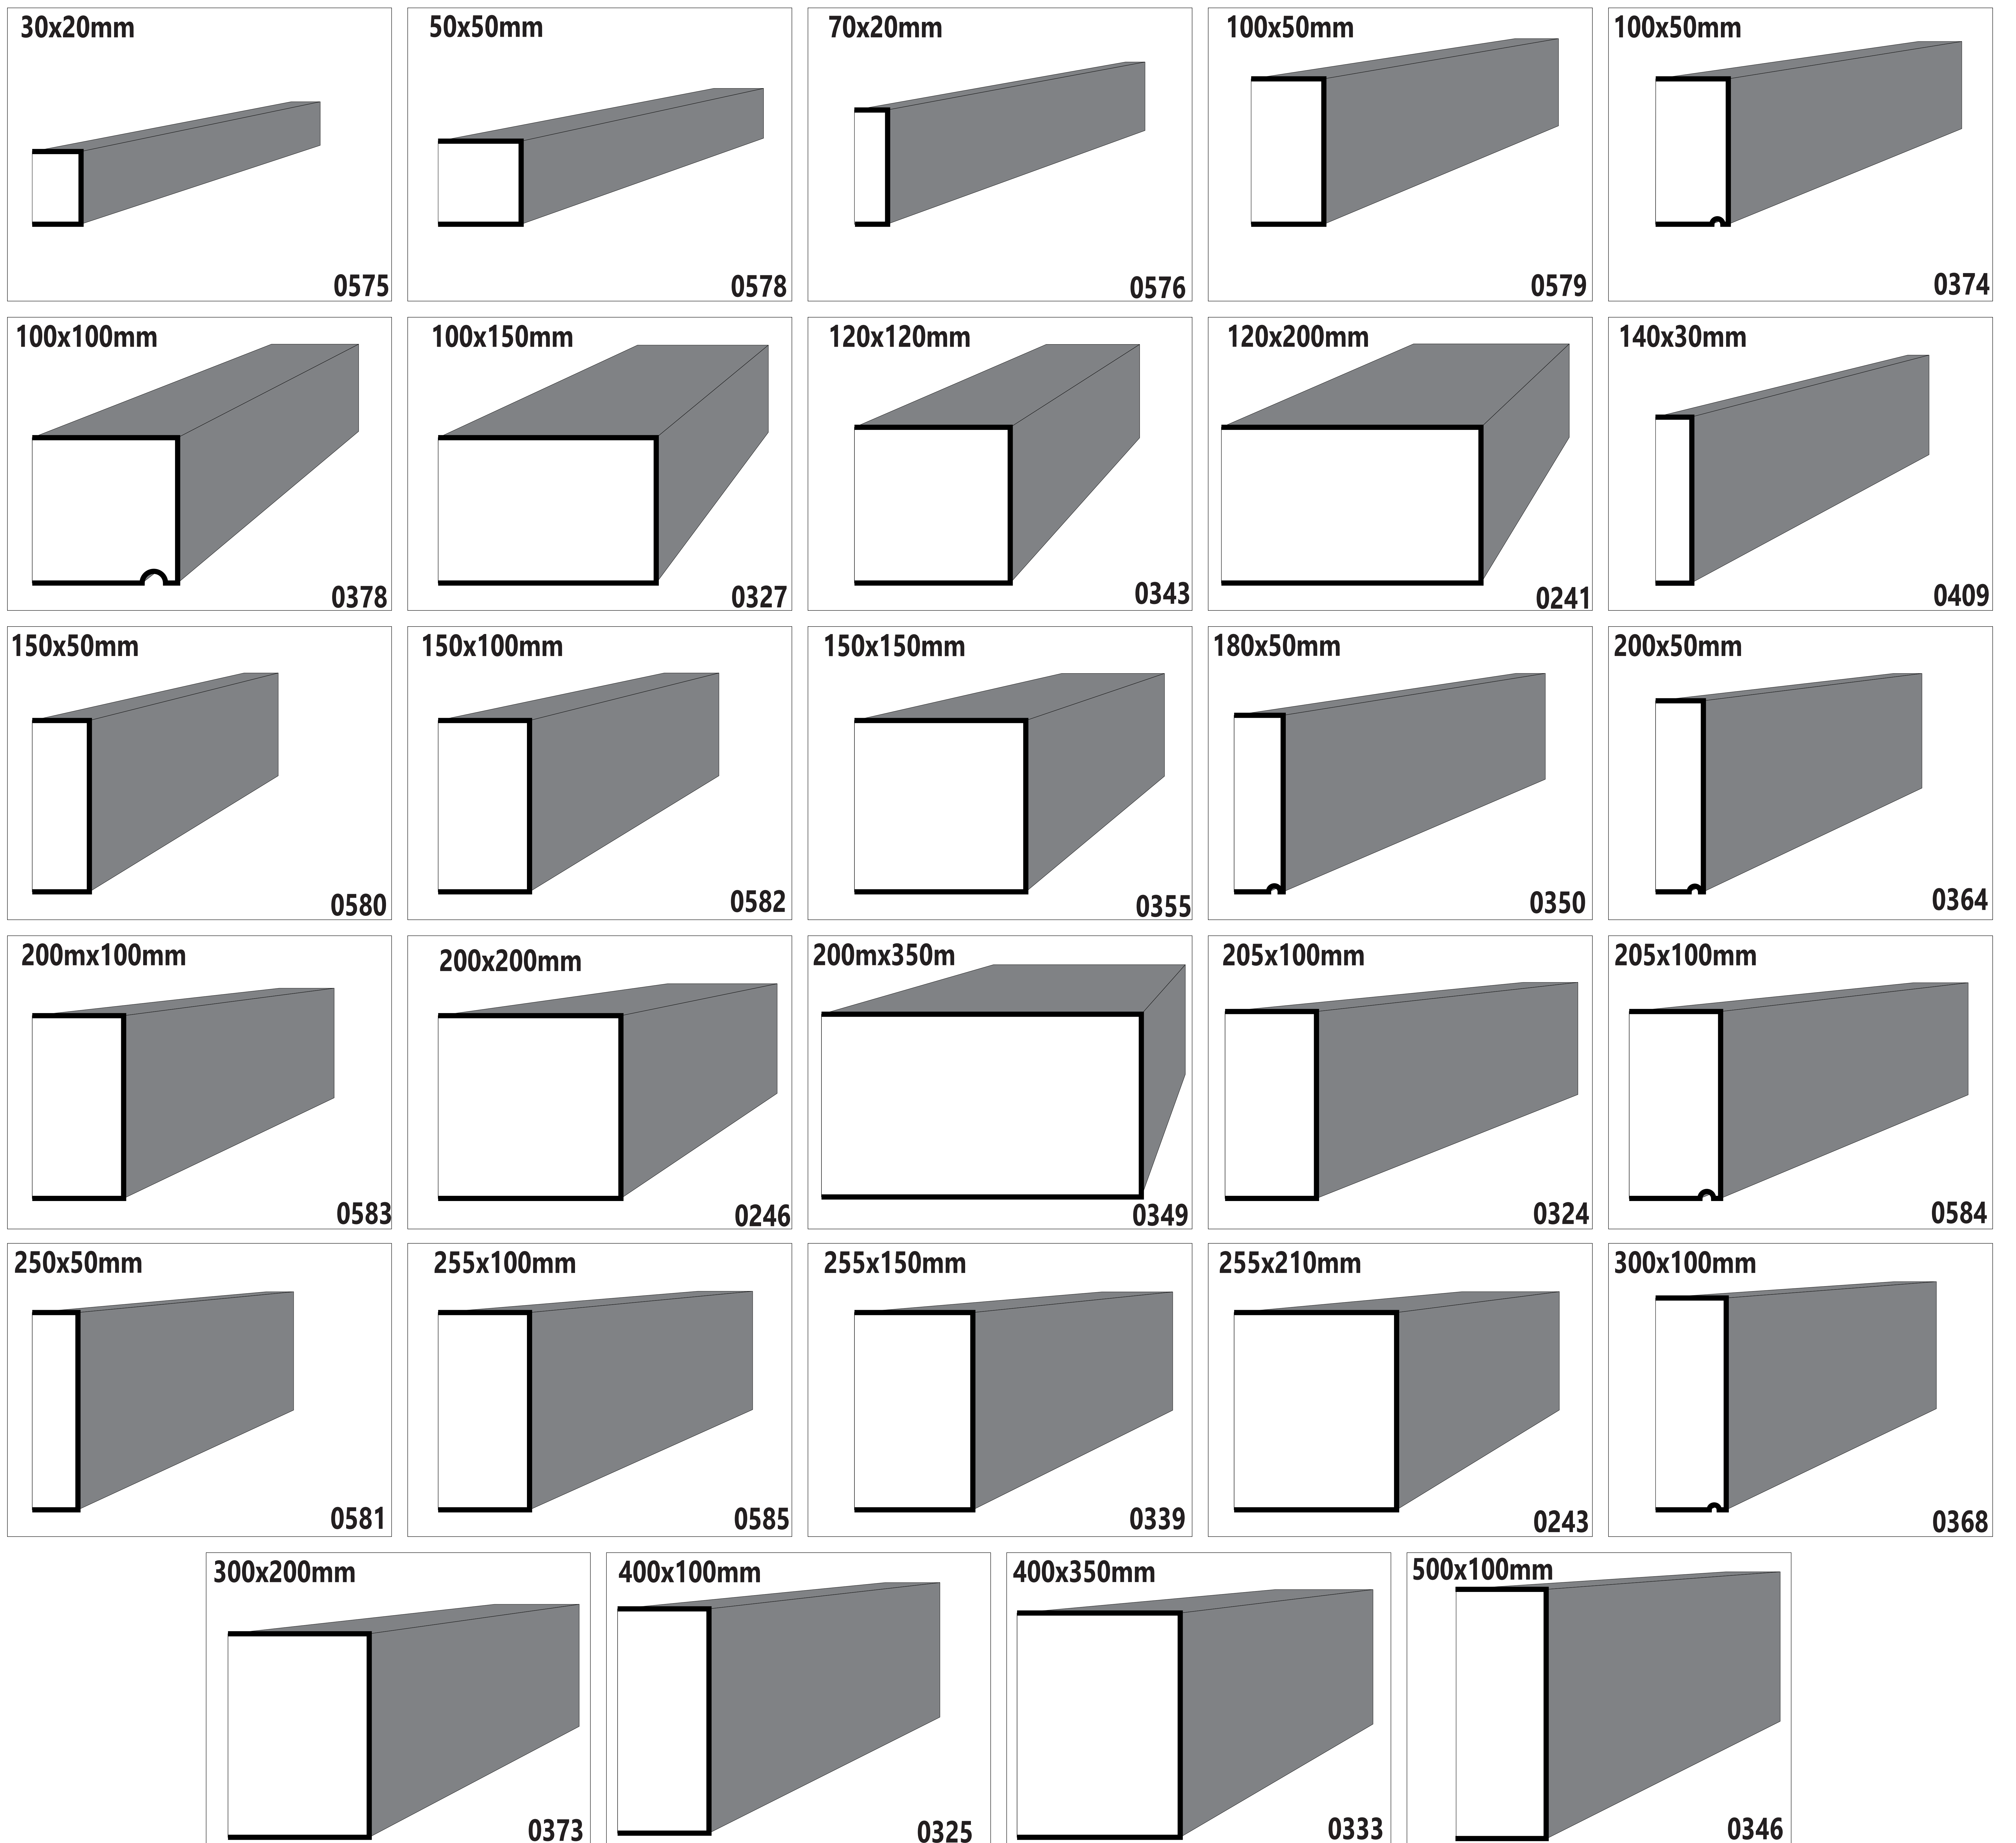

A Styroville conta com esses 19 modelos de moldura padrões, garantindo uma entrega mais rápida para atender as suas necessidades

O que antes era feito com pedra, madeira, cimento, ou gesso, agora segue para a linha da construção sustentável. Uma maneira prática, rápida e econômica para valorizar os detalhes dos ambientes externos da sua obra, a moldura de EPS pode ser aplicada em janelas, portas, rodapés, platibandas, beirais e colunas.

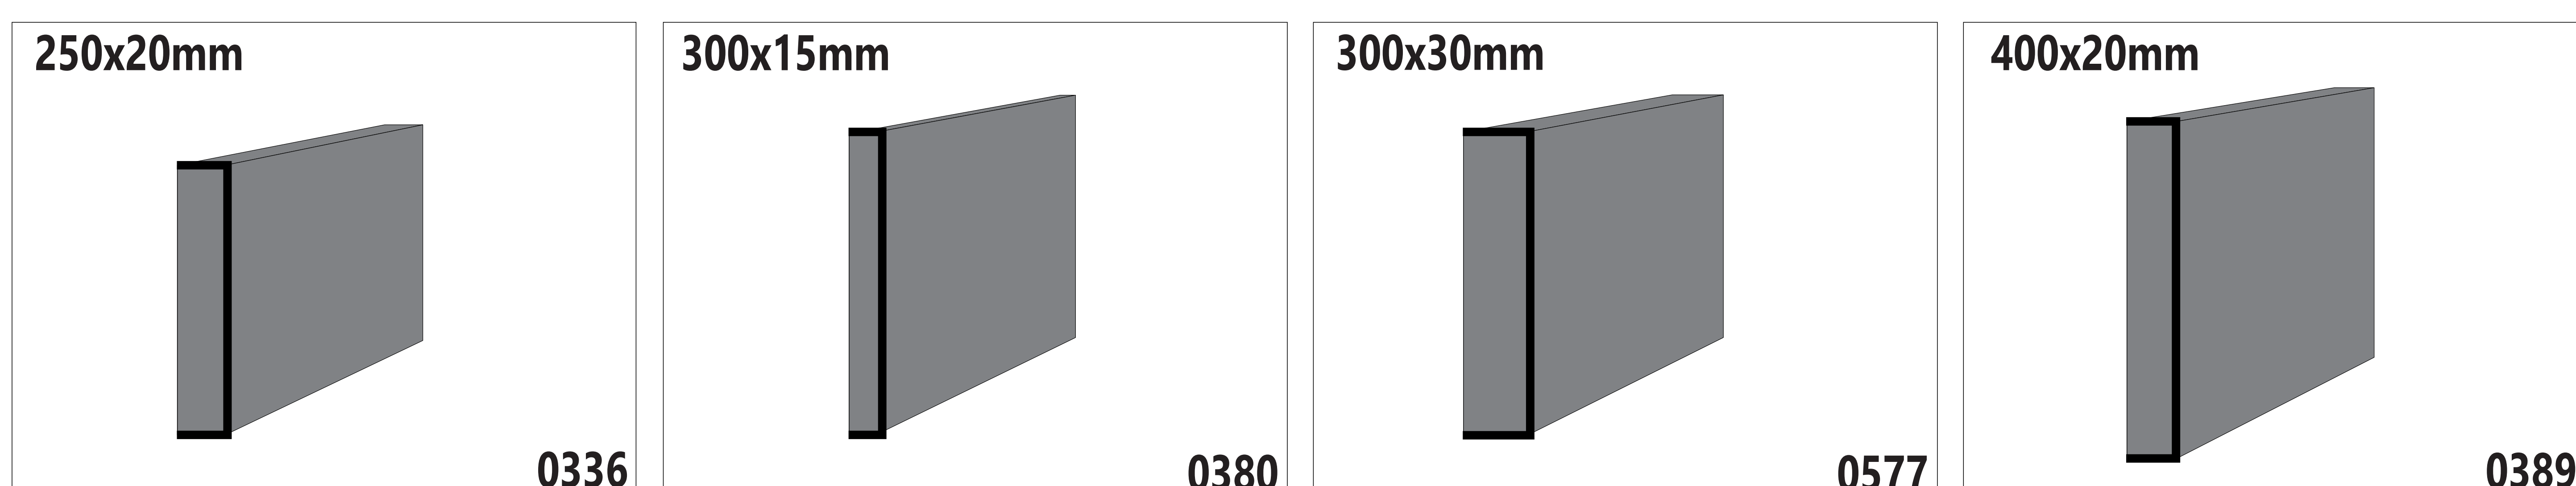

Tanto a eficiência quanto a estética da moldura de EPS dependem de um processo de instalação e fixação adequado. As molduras de EPS são bons exemplos das utilidades do poliestireno expandido em acabamentos.

Molduras CIMENTÍCIAS

RETANGULAR

ALMOFADAS

Leves e resistentes para aplicação em fachadas externas, reduzindo a mão de obra para aplicação e o tempo para execução, com excelentes resultados arquitetônicos.

Durabilidade e facilidade para aplicação do revestimento final são vantagens comprovadas.

Molduras CIMENTÍCIAS

Possuímos modernos equipamentos que permitem atender pedidos de peças personalizadas, seja qual for seu projeto, dimensão ou modelo.

Molduras CIMENTÍCIAS

FAIXA

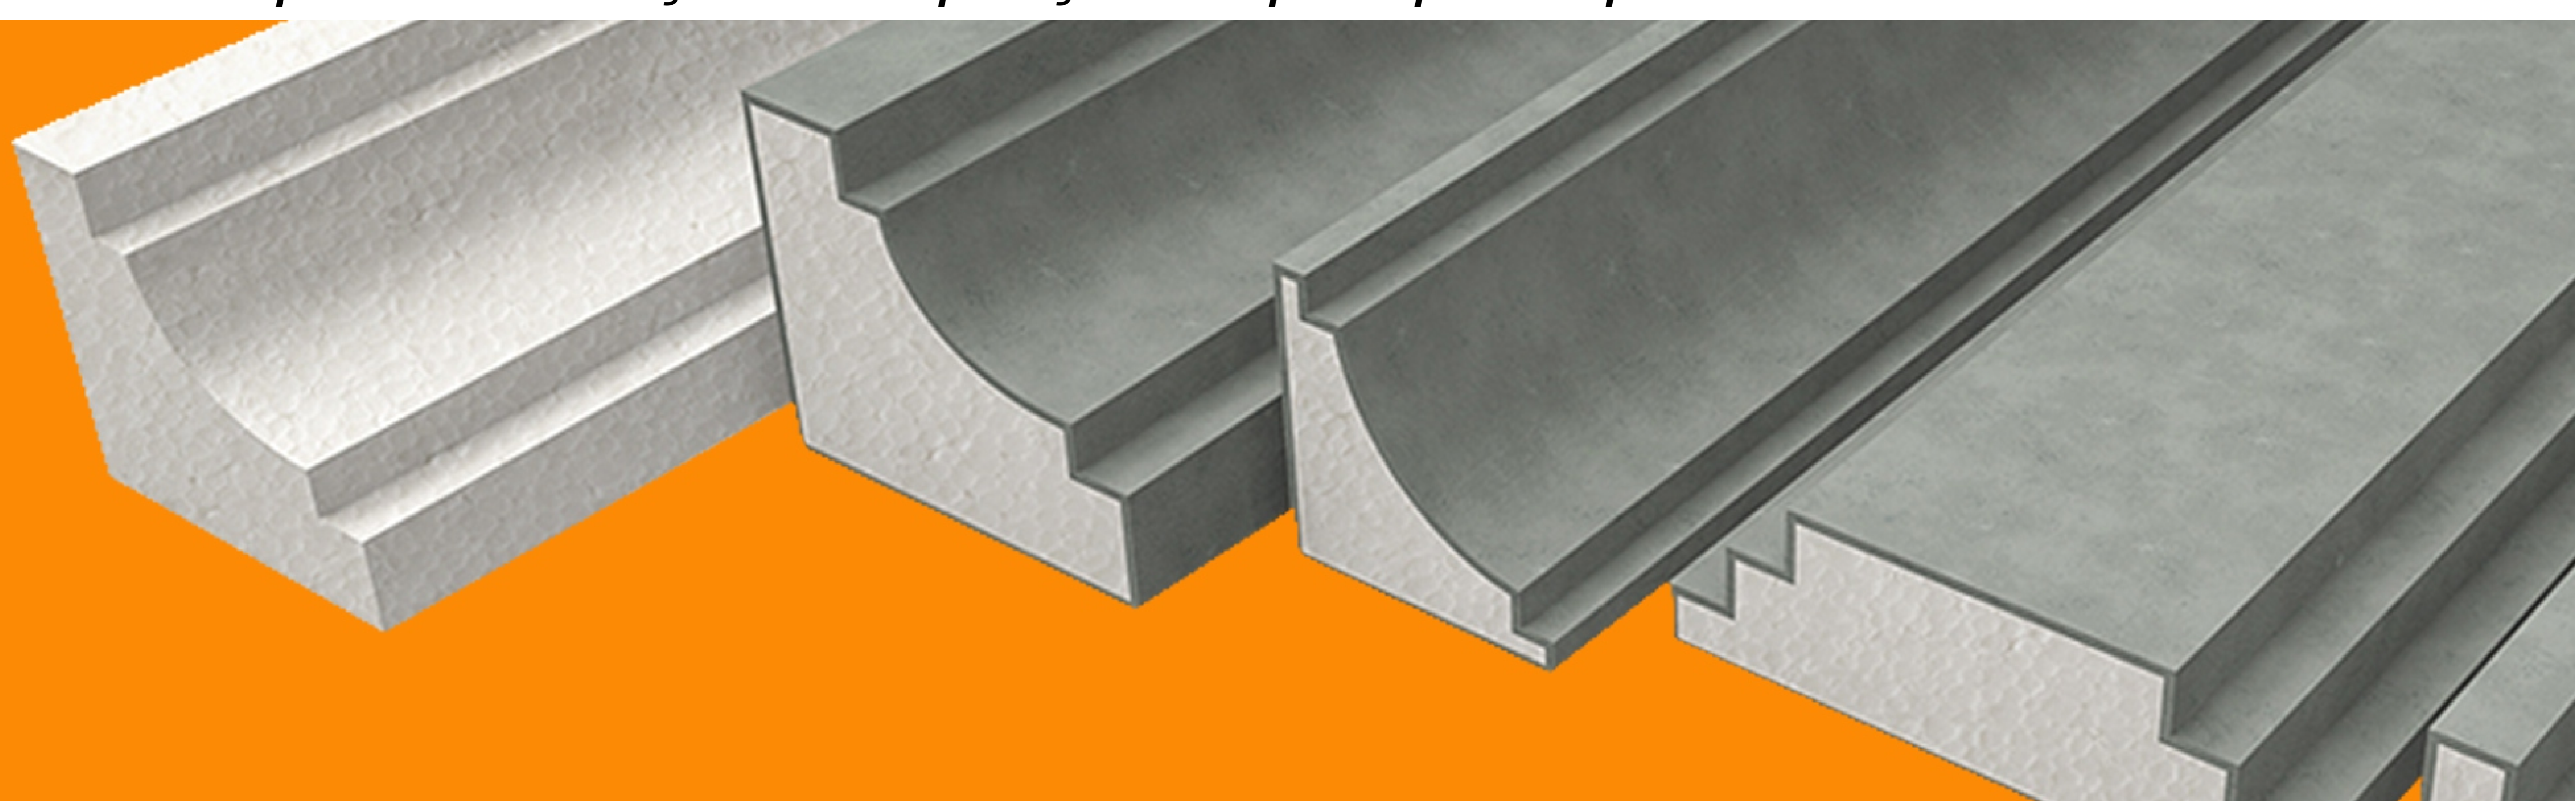

VANTAGENS:

Agilidade e facilidade na aplicação; Economia com mão-de-obra;

Alta resistência mecânica;

Aplicação em superfícies planas com ou sem revestimento;

Possibilidade de personalização; Adaptação a qualquer tipo de acabamento.
